

CPW Columns-----Mounting Wood Gates

In-swing gates hang on column corner, swinging in toward residence. Jamb are available for center-mount, restricting the swing radius to 110°

Column arrives as 3-sided assemblies to slip in place around the existing posts. Once in place, and the wiring is fed out the bottom of the column, the solid face is mounted in place to the pre-bored holes and

Front Grid Face to be assembled on site with pre-bored holes and plugs.
